

# HANDY SAMPLER VBI -112

## 1. Introduction

Handy Sampler VBI 112 sampler uses wet chemical methods to sample gaseous pollutants. It can be used to sample a variety of pollutants including oxides of sulphur and nitrogen, halogens, ammonia, sulphides, etc. The particulate sampling head provided with the system would be useful for monitoring particulates in different types of industries.

It can be useful for cement plants, food processing industry, construction sites and mining sites. It is available in handy design to carry easily to desired monitoring areas. Our offered **Handy Sampler** is rigorously tested on diverse parameters to guarantee its superior performance.

## 2. VBI - 152 Technical Specifications:

- **Flow Rate:** Adjustable Flowrate 0-3 LPM
- **Vacuum Pump:** Noiseless and Maintenance free vacuum pump
- **Power requirement:** 220V charger for charging the battery.
- **Filter Holder :** Filter holder designed to accept any standard 37mm diameter filter media.
- **Automatic Sampling:** Programmable Timer for Automatic Sampling.
- **Warranty:** One Year Manufacturer Warranty.
- **Impinger:** 2 Glass Impingers 35ml capacity.
- **Rotameter:** Acrylic Rotameter 0-3 LPM to set the flowrate.
- **Battery Charger:** 5V-1A Charger for battery charging.
- **Running Time:** Instrument can run on battery upto 8 hrs.
